DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed. Applicants arguments filed 10/9/2007 in reference to prior art references Schieve(US Patent 6,018,823) and Skrovan et al.(US Patent 6,016,554) were persuasive.
2. The following is an examiner's statement of reasons for allowance: The closest newly found prior art, Miller et al.(US Patent 7,149,823), teaches a bus(PCI/PCIX Bus interface 22, see Fig. 4), a non-volatile memory(nonvolatile flash memory 56, see Fig. 4) and a processor(microprocessor 52, see Fig. 4) all communicatively coupled. However, Miller fails to teach performing multi-tasking operations while accessing serial presence detect information during boot up operations prior to completing volatile memory initialization. Miller actually teaches accessing the nonvolatile memory without assistance of the microprocessor 52 to further increase the multi-tasking and efficiency of the overall system(see column 4, lines 14-17. Thus, the presently claimed invention is patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
